Tungsten Carbide Instruments

Five times normal instrument life with

Why tungsten carbide?

When you have heavy demands on your surgical instruments, be it scissors, needle holders or forceps, you should consider the benefits of the working surfaces of these instruments made out of one of the hardest alloys available.

As a rule, performing the same type of work, a tungsten carbide instrument will last up to five times longer. For instance, the cutting edges of a pair of scissors, even when used to cut the toughest tissue, will outlast the regular stainless steel pair of scissors by 5 times.

Compare the extra initial cost for these instruments with the length of useful wear and you have a very cost effective solution to your instrument requirements. The tungsten carbide inlays are either glued or welded into place. Due to the properties of the alloy very particular patterns can be achieved on its surfaces. For instance, the delicate pyramid cross pattern profile on the tungsten carbide surfaces of needle holders will hold suture needles much more securely.

The following instruments are available in Tungsten-Carbide:

- Scissors
- Needle Holders
- Forceps

Super Cut Scissors

MAHR Super Cut scissors with their uniquely ground edges are synonymous with ultimate cutting efficiency. The special micro serration in conjunction with the uniquely ground edges ensure precise, fine and minimally traumatising cuts. All our well-known models such as Metzenbaum, Mayo or Iris scissors are supplied with the supercut finish. MAHR supercut scissors have a gold-coloured screw for ease of identification.

The range of supercut scissors from MAHR comprises all models used routinely by surgeons: scissors for delicate and extremely delicate dissecting, e.g. Iris and Mikro, models according to Metzenbaum in all possible lengths and designs, e.g. in a slim version for especially fine cutting to name but a few.

The supercut scissors can also be supplied with “HM” welded cutting edges of solid tungsten carbide alloy. The junction between the steel of the scissors and the tungsten carbide is seamless and homogenous. The welded cutting edges of solid tungsten carbide alloy guarantee excellent cutting quality and long life-span.

Features and benefits

MAHR Tungsten Carbide and Super Cut scissors offer the security of blade sharpness and guaranteed strength.

- **Choice of blades**
  Tungsten Carbide or Super Cut

- **Blade design**
  Tungsten Carbide inserts are seamlessly bonded to the finest quality stainless steel surgical scissors and then precisely ground and honed on diamond wheels. Super Cut scissors have a finely beveled blade with a razor-sharp edge and opposing blade with micro-fine serrations to prevent tissue slippage and facilitate effortless cutting.

- **Strength & hardness**
  Manufactured to ensure greater Rockwell hardness for instrument durability and longer-lasting blade edge sharpness.

- **Screw lock**
  Fully tempered precision screw locks maintain perfect alignment.

- **Laser etching**
  All scissors are laser etched with our logo for easy re-ordering. Advanced laser techniques are used and will not harm or damage the instrument as did older and traditional acid etching techniques.

- **Ergonomic design**
  Outstanding instrument design combines weight, balance and feel for optimal comfort and performance.

- **Ring handles**
  Well rounded and polished for better “feel and comfort” as well as prevention of hand fatigue. Gold and black finished handles differentiate Tungsten Carbide and Super Cuts as precision instruments.

Mahr Guarantee

Our history?

For over 10 years, MAHR instruments have been used successfully by sterile services departments all over the world. In the unlikely possibility that you should encounter a problem all MAHR Tungsten Carbide and Sure Cut instruments are covered by a lifetime guarantee.

If for any reason you are not satisfied with the quality or performance of our products, simply return it to us within 30 days of purchase for a full refund. We will however require proof of purchase.

What does MAHR lifetime mean?

Lifetime refers to the life of the product or at such a time, during normal use the product can no longer function for the specific purpose intended. Our guarantee does not include fair wear and tear.

MAHR recommends regular maintenance of your instruments such as proper cleaning and lubrication. Nail cutters and other cutting instruments will become less sharp over a period of time due to wear and tear. Other products are covered by guarantees offered by the manufacturers.

However, obvious signs of abuse, corrosion due to the use of unapproved disinfecting agents, damage caused by unapproved sterilisation methods and excessive mishandling, are not legitimate claims under the terms of this guarantee.
Mahr offers a range of healthcare solutions:

STERILE SINGLE USE INSTRUMENTS PACKS

THEATRE QUALITY REUSABLE INSTRUMENTS

DENTAL INSTRUMENTS

OPHTHALMIC INSTRUMENTS

VETERINARY INSTRUMENTS

PODIATRY INSTRUMENTS

STERILE SERVICE SOLUTIONS
